About Us

The Sustainability norms have become more critical than ever. Consumers are becoming increasingly aware of the negative impacts on their lifestyles, purchases, and travel habits have on the environment, and globally, all stakeholders are aligning with businesses that align with their values and processes.

Sustainable practices support ecological, human, economic health, and vitality.

Resources are finite and, therefore, should be used conservatively and wisely with a view to long-term priorities and consequences of the ways in which resources are used and deployed.

We are a team of senior professionals, helping organizations maximize their profits and efficiency while reducing their environmental footprint through research and strategy.

With a focus on Mergers and Acquisitions, we operate under the five primary verticals:

Renewable Energy

M&As of stressed assets in the Solar, Wind, Hydro, Wave, and EV sectors. Carry out energy surveys and audits and advise clients on sources of renewable energy, smart energy, smart city projects & solutions.

Infrastructure

M&As of stressed real-estate assets and providing advisory services on sustainable solutions within the norms of the environmental requirements and infrastructure sectors by analysing the available technical data. These include highways, land & buildings, water projects, pharmaceuticals & chemicals and industrial sectors.

Services

We provide Energy Storage Solutions for the Renewable Energy Sector, Telecom sector, Data Storage and Banking Sector, Military & Mission Critical Projects, and the Hospital & Hospitality sectors.

We help clients in engaging with potential investors, mergers & acquisitions, solutions & growth initiatives with innovative products and services. We also help in liaising with various government departments using our network of professionals.

Manpower

We have the ability to align diversified and intricate HR needs of our clients by providing reliable and strategic staffing solutions including L&D interventions by understanding the significance of aligning talent strategy with business strategy we tend to offer workforce solution that drive businesses forward.

Acquisition of specific portfolio projects and execution of the same as per our core objectives being mission and vision goals.

IRY SOLUTIONS strong reputation has taken us forward as a 'preferred service provider' for most of the top blue chip companies in India, the APAC, MENA and the ASEAN region, for most of the incumbent sectors with the small, medium to large players in these industry segments, for their position closure, over years.

Challenges related to Energy Storage

- Energy Cost is roughly 33% of the Network Operating Cost.
- Battery banks are deployed for energy storage in case of grid supply failure.
- DG sets are deployed as secondary back up if the battery bank is discharged.
- Batteries are not maintained properly on the sites causing pre-mature failure of battery cells.
- New batteries are replaced with old batteries in every 2 - 3 years causing huge capital expenditure.
- Huge CAPEX investment and O&M cost is the main concern.

EaaS

Industrial Solution

Energy-as-a-Service

EaaS is a unique solution to address the Energy Efficiency Gap & its open possibilities for the future growth. Energy-as-aService (EaaS) is a business model whereby customers pay for a service without having to make any upfront capital investment.

EaaS models usually takes the form of a subscription for energy storage devices owned and maintained by a service provider to deliver the desired energy back up in case of grid failure.

Current Challenges

Buying Battery on CAPEX

- Battery back-up is a Non-priority sector for lending from banks.
- OPEX model not available globally for the battery storage sectors
- There is prohibitive CAPEX engagement for these industries
- Due to which project proposals become unviable
- Battery storage solutions are hardly considered in any of the sectors except in telecom and banking

- No battery storage solutions are available on lease or subscription.
- CAPEX on batteries depreciates over 15 years or more.
- Immense issues with maintenance & servicing of these large battery banks
- Storage and logistics space availability is an issue
- Pilferage adds to further losses
- Insurance is costly

- OPEX funding / Lease rental options available*
- Technologically agnostic solutions
- Brand agnostic solutions
- Lead acid. Lithium-ion batteries etc., to be used
- Battery rejuvenation of lead acid batteries
- Dedicated skilled technical team for timely operations & maintenance

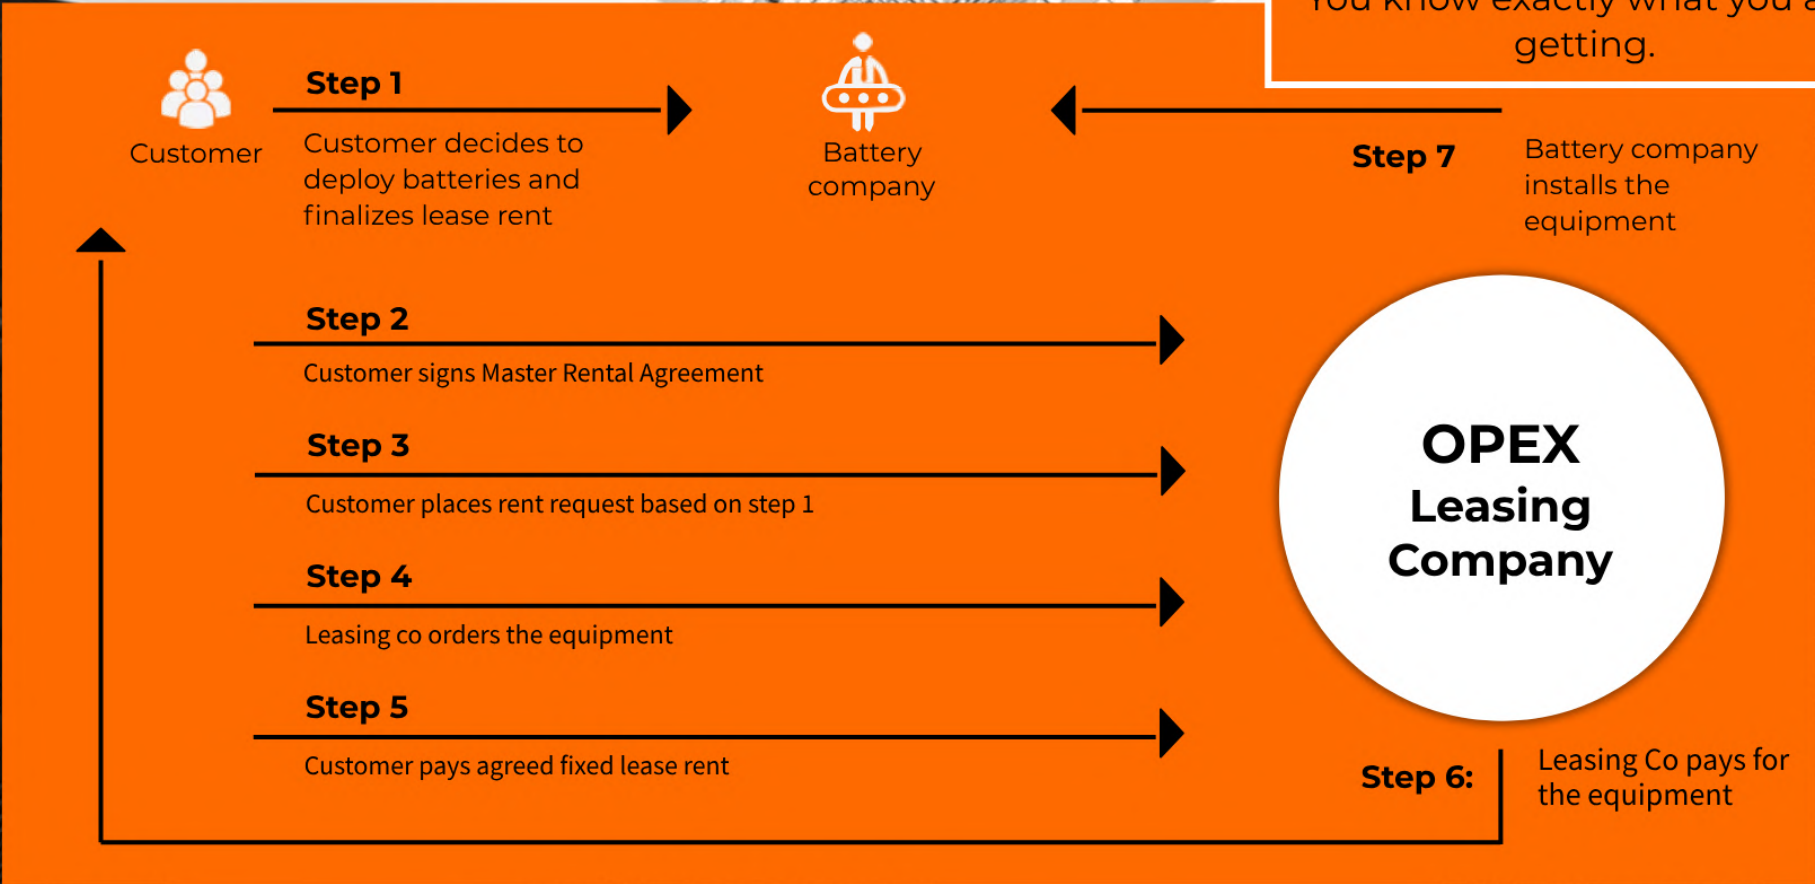

*T&C applicable

- Easy processing of orders & funds*
- Minimum documentation related to leasing to renowned organization*
- Lease rent on minimum interest rates*
- Inventory management support extended
- Fast deployment at sites
- CAPEX solution also available

*T&C applicable

EaaS Lifecycle

Our lease/rental process is easy and cost effective. You know exactly what you are getting.

Growing Demand

India ranked sixth in the list of countries to make significant investment in clean energy by allotting US\$ 90 billion in between 2010-H22019.

*Growing population along with increasing electrification and per-capita usage will provide further impetus. Power consumption is estimated to reach 1,894.7 TWh in2022.

Attractive Opportunities

Under the Union Budget 2021-22, the government allocated Rs. 305,984 crore (US\$ 42 billion) for a revamped, reforms-based and result-linked new power distribution sector scheme over the next five years.

*In June 2019, Government launched US\$ 5 billion of transmission-line tenders in phases to reach 175 GW target by2022.

Policy Support

100% FDI allowed in the power sector has boosted FDI inflow in this sector.

*Schemes such as Deen Dayal Upadhyay Gram Jyoti Yojana (DDUGJY) and Integrated Power Development Scheme (IPDS) are expected to augment electrification across the country.

Higher Investments

As per the National Infrastructure Pipeline 2019-25, energy sector projects accounted for the highest share (24%) out of the total expected capital expenditure of Rs. 111 lakh crore (US\$ 1.4 trillion).

*Total FDI inflow in the power sector reached US\$ 15.36 billion between April 2000 and June 2021.

ADVANTAGE INDIA

- **Growing demand:** India ranked sixth in the list of countries to make significant investment in clean energy by allotting US\$ 90 billion in between 2010-H22019.
- **Higher investments:** As per the National Infrastructure Pipeline 2019-25, energy sector projects accounted for the highest share (24%) out of the total expected capital expenditure of Rs. 111 lakh crore (US\$ 1.4 trillion). Total FDI inflow in the power sector reached US\$ 15.36 billion between April 2000 and June 2021.
- **Policy support:** Electrification in the country is increasing with support from schemes like Deen Dayal Upadhyay Gram Jyoti Yojana (DDUGJY), Ujwal DISCOM Assurance Yojana (UDAY), and Integrated Power Development Scheme (IPDS).
- **Attractive opportunities:** Under the Union Budget 2021-22, the government allocated Rs. 305,984 crore (US\$ 42 billion) for a revamped, reforms-based and result-linked new power distribution sector scheme over the next five years.

2050—theFuture!

Wind, water, geothermal and solar power can meet the worldwide demand for 11.804 TW of energy while avoiding the predicted global temperature increase of 2.7 degrees Fahrenheit (1.5 degrees Celsius) above preindustrial levels by 2050.

The researchers outline how doing so would save the lives of 4 million to 7 million people who might have otherwise died from diseases caused by air pollution, save countries more than \$20 trillion overall in health and climate costs, and produce a net increase of more than 24 million long-term jobs.

Planet Texas 2050 is a research grand challenge at The University of Texas at Austin. We're a team of more than 150 researchers across all disciplines working together over the next decade to find ways to make our state more resilient in the face of extreme weather events and rapid population growth.

Advisory Board

Sanjeev Anand

Advisor

Currently Sanjeev is the Group CEO of Atlas Mara-BancABC. He has been a serial CEO leading and advising institutions spanning Asia, Europe, GCC and Africa, across regional and global banking groups such as Citigroup, Actis-I&M, Banque Populaire, Development Bank of Rwanda and Euro Exim Bank. His track record has been in transformation, turnaround, start-ups, scaling and M&A. He retains a number of Directorships in banking, financial services and manufacturing sector.

He is a Life Member of the BRICS Chamber of Commerce and was its Honorary Director for Africa, working on investment and trade facilitation. He was also the Vice Chairman and acting Chairman, for two terms, for an emerging sovereign fund, guiding its formation. His experience includes financings and projects for public and private sector companies, as well as PPP working alongside local, DFIs, bilateral and multilateral partners.

He has been the member of the investment committee for Access to Finance and the Steering Committee of the East Africa Monetary Unification.
